

CS890BX – Digital Asset Management

Final Exam (Take Home) – April 16, 2003

- 1) what is the potential for digital asset management, especially for (interactive) television, and how important is it to the success of the industry - in your opinion.
- 2) what are the technical issues to be considered before a widespread deployment of the system we've considered could be mounted?
- 3) what are some techniques that might be employed to allow users to easy work with pre-exisiting databases? How might user preferences be easily articulated in the approach we've considered?
