User Might have none or many posts. A post must have only one user that posted it.

A Re-Post should have who posted it, and what it is a re-post of. The re-post should also any content that the user would like to add to it (content and URL) as well as when it was re-posted.

The re-post must have only one re-poster, and only one original post. A post might have been re-posted many times, or it might not have been re-posted yet. A user might have made many re-posts or none yet, But each re-post must have been made by only one user.
