Entity Relationship Diagram with re-post table

Similar to Twitter, Facebook, etc., where shared posts ("re-posts") do not have their own original content.

Re-posts can include a reply or rating, e.g. "this is funny!".

A user may create one or many posts. Each post can be created by only one user.

A user may share many re-posts. Each re-post has only one user.

All re-posts must have the same original post.

A post may have zero or many re-posts.
